

# Capacity for the 2030 Agenda

## Reviews and data for decision-making

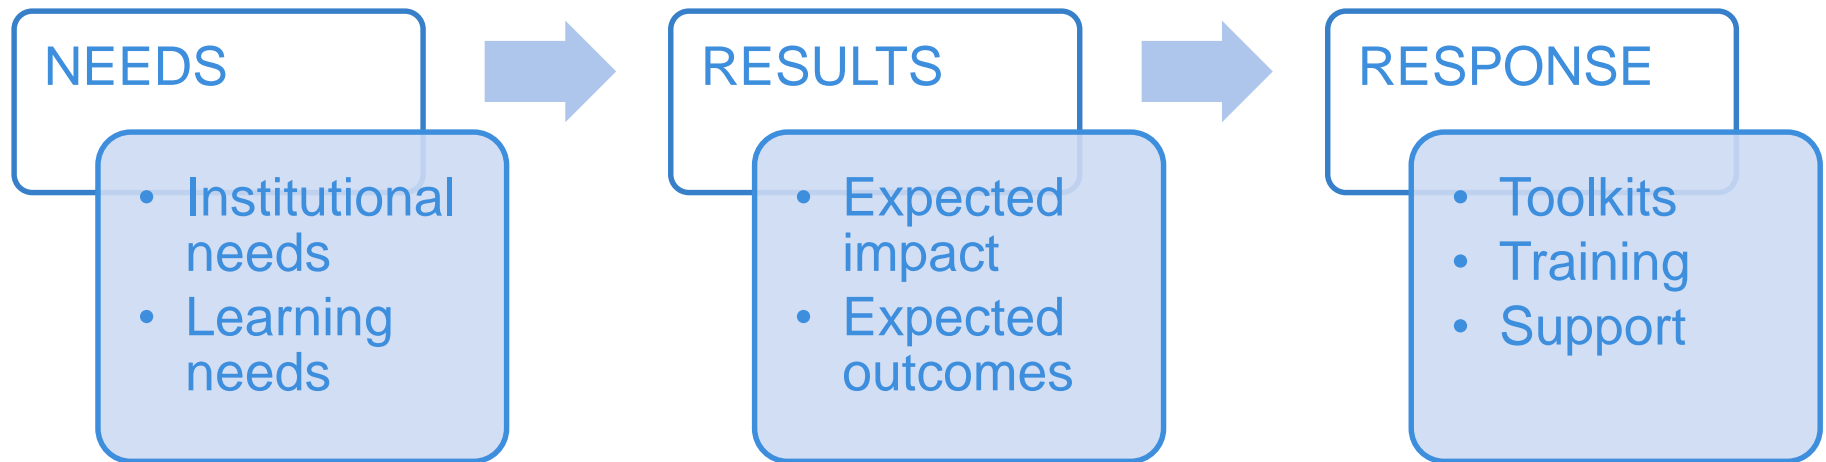

# PROJECT OVERVIEW

## SUMMARY TABLE: OUTPUTS OF THE CAPACITY FOR THE 2030 AGENDA PROJECT

THEMATIC FOCUS TYPES OF INTERVENTIONS	A. Coherent mainstreaming of SDGs in national policy-cycle	B. Reviews/data for evidence-based decision-making	C. Intersectoral policy coherence
i. Generic toolkits	Yes	Yes	Yes
ii. Training in regional locations and e-learning	No	4-9 workshops and 1-2 e-learning courses	4-9 workshops and 1-2 e-learning courses
iii. Methodological support	<i>To a limited number of countries if there is demand</i>	<i>To a limited number of countries</i>	<i>To a limited number of countries</i>

*With support from Switzerland and Sweden*

## UNITAR's approach: strengthening individual and institutional capacities

**SUMMARY TABLE: OUTPUTS OF THE CAPACITY FOR THE 2030 AGENDA PROJECT**

<b>THEMATIC FOCUS</b> <b>TYPES OF INTERVENTIONS</b>	<b>A. Coherent mainstreaming of SDGs in national policy-cycle</b>	<b>B. Reviews/data for evidence-based decision-making</b>	<b>C. Intersectoral policy coherence</b>
<b>i. Generic toolkits</b>	<i>Yes</i>	<i>Yes</i>	<i>Yes</i>
<b>ii. Training in regional locations and e-learning</b>	<i>No</i>	<i>4-9 workshops and 1-2 e-learning courses</i>	<i>4-9 workshops and 1-2 e-learning courses</i>
<b>iii. Methodological support</b>	<i>To a limited number of countries if there is demand</i>	<i>To a limited number of countries</i>	<i>To a limited number of countries</i>

*With support from Switzerland and Sweden*

## **Basis for designing a detailed training needs assessment:**

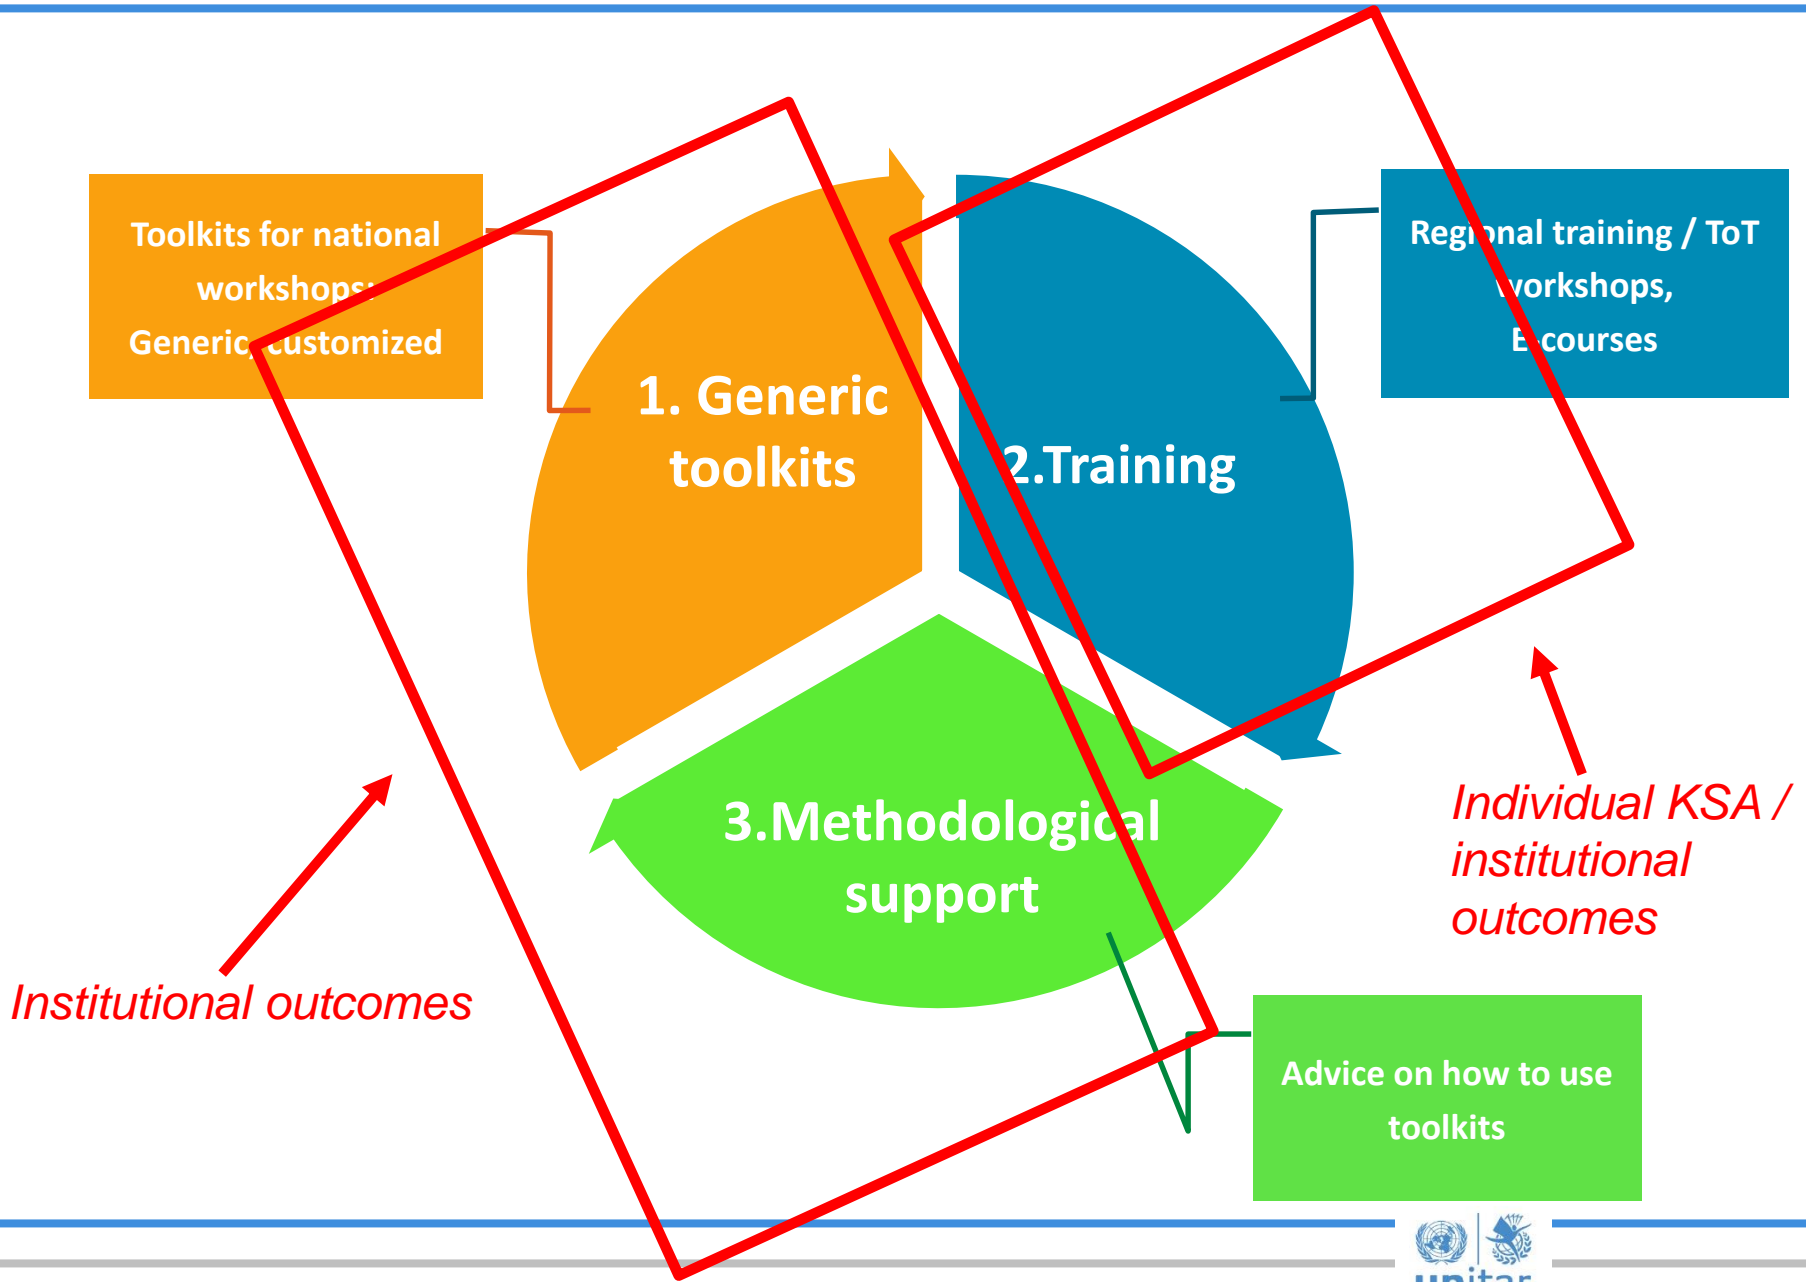

- Country-led evaluations and data as a basis for reviews
- Challenge of ensuring timely data availability for decision-making
- Challenge of ensuring effective data use by policy-makers
- Addressing data disaggregation and integrative approach
- Leveraging new sources of data
- Looking at specific needs, challenges and opportunities for African and Asian LDCs, Caribbean SIDS
- Findings and recommendations of the Data Panel

**LDCs and SIDS**

**METHODOLOGY**

# RESPONSE: Enhancing impact

## What is a toolkit?

### Toolkit

*Set of PPTs, exercises and manuals available online to national facilitators*

### National workshop

National Government/Coordinating Ministry

### Roadmap!

## - Mapping tools

The screenshot shows a software interface for mapping national strategies against global goals. It features a table with the following columns: I. Global goals, II. Lead, III. Relevance, and IV. Mapping of national strategies and gap analysis. The table contains detailed text and numerical data points, likely representing the alignment of various national strategies with the Sustainable Development Goals.

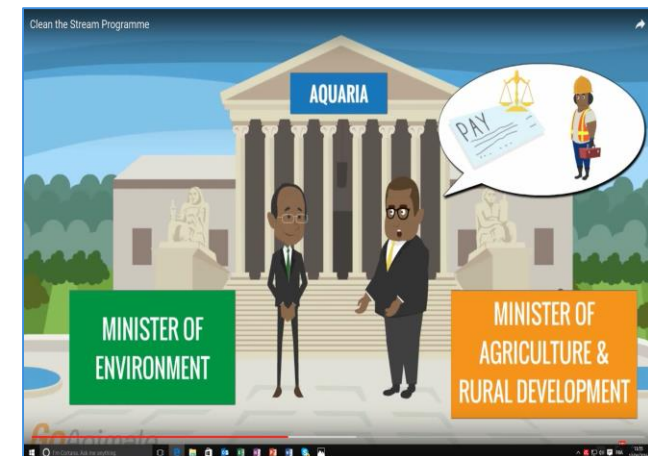

## - E-tutorials

## - Libraries of good practices

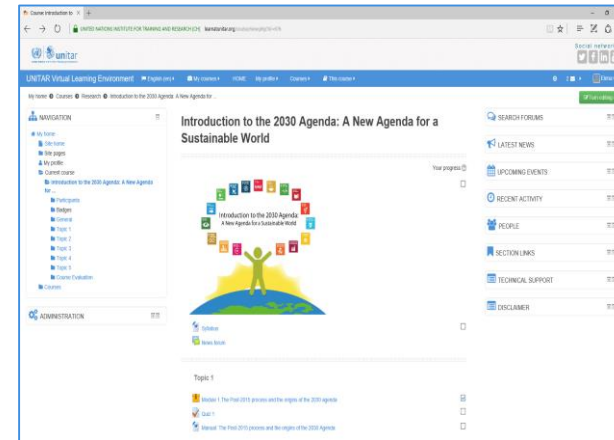

## - Learning videos

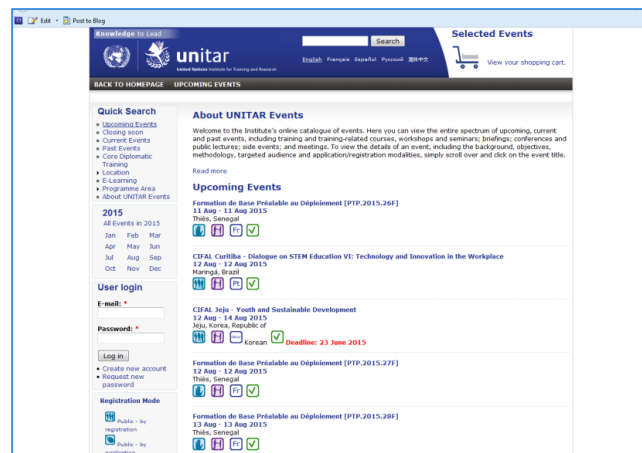

## - Face-to-face courses

## - E-learning

## - Blended learning

**African / Asian LDCs and Caribbean SIDS**

## Advisory services for pilots

- How to do training needs assessment
- How to adapt training toolkit to national / local needs
- How to run a training workshop
- How to evaluate a training workshop

## Upon request

- Direct support
- Distant support
- Limited number of countries

**EVALUATION**

## Kirkpatrick model

Level 1 – perception-based

Individual level

Level 2 – objective assessment

*(at the end of training)*

Level 3 – application of the acquired knowledge in a professional context

*(6 months after)*

Institutional level

**Output 2:** 2 generic toolkits on reviews and data / 200 platform users  
Customized methodological support on request

**Output 3.** 4-5 regional training workshops for African LDCs and Caribbean  
SIDS/Asian LDCs  
2 e-learning courses

**Intermediary Outcome 2:** The capacities of policymakers, statisticians and evaluators are strengthened to better interact and establish/adjust national review, M&E and data systems, and produce and use data for evidence-based policy making for the SDGs through customized activities for LDCs and SIDS and access to learning tools for other Member States.

*70% of participants agree that*

- *Content was relevant*
- *Learning objectives were met*
- *Their awareness has increased*

**Individual capacities**

*70% of participants have their KSA increased*

**Final Outcome 1.** Governments and other stakeholders use open source toolkits enabling them to strengthen reviews, M&E and enhance policy coherence for the SDGs.

*- 60% of toolkit users reporting a concrete action*

**Final Outcome 2.** Processes and systems are in place in LDCs and SIDS to produce and use timely and quality data in designing policies, programmes and projects aimed at SDGs.

*- 50% of participating countries reporting strengthened systems*

**Final Outcome 3.** Governments and other stakeholders in LDCs and SIDS are able to conduct effective, participatory national reviews/ prepare VNRs for HLPF.

*– 70% of participants reporting application of 1-2 good practices and 2-3 changes in their work place*

**Institutional capacities**

**Desired impact.** The 2030 Agenda is translated into action by national governments and other stakeholders as a result of better prepared institutions and strengthened skills of key change agents.

# iSDG-BASED TOOLKIT

# Using a simplified iSDG model and gaming methodologies in a training context

LDC model

SIDS model

MIC model

Developed country model

**For policymakers**

**Looking forward to your feedback.**

**Thank you!**
